#### **Powerful Performance with Optimized Cost**

QSAN XF3 series is a cost-effective NVMe flash storage solution with the best balance of performance and cost. With  $\mu$ s-level latency, the XF3 assists enterprises in meeting the responsiveness needs of most enterprise applications. The XF3 is ideal for modern applications including cloud collaboration, large scale surveillance, and high-speed business backup alike.

#### Accelerate Your Business with µs-Level Latency

The XF3 series features an NVMe SSD architecture to ensure consistent response times, prioritizing steady performance instead of occasional peak throughput. Tailored for enterprise high-performance computing infrastructures, it delivers high IOPS with latency at the microsecond level. With minimal latency concerns, applications are shielded from slowdowns or halts caused by high response times. Matching with the RDMA technology, XF3 can mostly eliminate the latency when accessing data from the host to the drive.

#### **Always-on for Business**

XF3 is equipped with hot-swappable, and fully redundant hardware design, streamlining maintenance and upgrades. Its dual active controllers operate, and online firmware upgrades deliver seamless storage services in real-time, guaranteeing uninterrupted service delivery with zero downtime.

#### **Sweatless Management Experience**

XEVO, the flash-based storage management system, excels in efficiency, ensuring data access within just 5 minutes of initial storage deployment. Its intuitive dashboard and robust reporting system enable managers to analyze business usage and monitor storage status in real-time. Furthermore, external management functionalities like RESTful API, SNMP, and email notifications provide managers with holistic system oversight, empowering them to make informed decisions.

#### **Reduce Business Overhead through Data Reduction**

Equipped with advanced data reduction capabilities, including deduplication and compression, the XF3 offers unparalleled efficiency, allowing businesses to significantly reduce overhead costs.
